

LACHLAN ROBINETTE

Microsoft Solutions Architect | Identity, Endpoint & Security Baselines for MSP Clients | SC-300 & MD-102

Lehi, UT · (801) 637-1933 · LachlanRobinette@gmail.com · linkedin.com/in/LachlanRobinette

Microsoft solutions architect with four years inside MSPs, SC-300 and MD-102 certified. Designed and owned the Microsoft 365 identity, endpoint, and security baseline for 35 active client tenants at a 76-client MSP, taking the client base from no standard to an enforced one in under four months. Led the technical side of a competitive bid against four other MSPs, built and priced a managed AI service line with Copilot packaging, and wrote the 135-task onboarding runbook the support team delivers from. Earlier, Director of Managed Services at a 50-person MSP leading 35+ staff. Builds IAMAI, a read-only identity posture assessment tool, on nights and weekends.

EXPERIENCE

Galaxy IT · Murray, UT

Jun 2025 – Jul 2026

Microsoft Solutions Architect · Support Team Manager

- Owned identity and security baseline architecture across 35 active tenants (76 clients under management) with inforcer as the enforcement layer: drift reported for manual review so intentional tenant-level exceptions stick. Scope spanned Entra ID, Conditional Access, Intune, Defender, Exchange Online, SharePoint, and Purview policy sets.
- Designed the zero-trust access model for the client base: tuned inforcer's default Conditional Access set into a device-trust policy where compliant, workplace-registered, and unmanaged devices each carry their own sign-in frequency and MFA strength, built around passkey enrollment and Intune device compliance telemetry. Deployed at a client, then adopted company-wide.
- Led the technical side of a competitive bid for a 75-user prospect against four other MSPs following an identity-based breach, as the only bidder leading with identity-layer posture rather than endpoint protection. Authored the vendor comparison and the remediation plan.
- Authored a six-workstream, 135-task onboarding runbook for Business Premium identity and device provisioning, and mentored the support team through it.
- Diagnosed and remediated machine identity defects in an inherited baseline: missing first-party service principals silently breaking Intune policy deployment, a hardcoded tenant GUID breaking Known Folder Move across client tenants, and a tattooed Edge policy value cleared via SYSTEM-context PowerShell. Filed vendor QA on a partial-baseline policy count mismatch.
- Root-caused the identity failures that break rollouts in the field: Windows Hello for Business container corruption, token protection blocking Outlook, broker authentication failures, and stale MFA methods that only surface the day a real policy finally prompts.
- Built and priced the managed AI service line, including tiers, Copilot packaging, and the pitch to leadership; served as the internal AI resource for workflows, automations, and client-facing use cases.

Summit Technology · Salt Lake City, UT

Nov 2024 – Jun 2025

Service Delivery Manager

- Owned project and service delivery, C-level client relationships, and Tier 2+ escalation strategy across the client base.

Wasatch IT · Salt Lake City, UT

Jun 2022 – Oct 2024

Director of Managed Services

Aug 2023 – Oct 2024

Help Desk Manager · Team Lead · Technician

Jun 2022 – Jul 2023

- Promoted four times in 26 months; led 35+ technicians and managers across multiple departments at a 50-person MSP.
- Evaluated, selected, and migrated the PSA, RMM, and phone system with zero downtime: HaloPSA, NinjaOne, and DialPad.
- Grew managed services recurring revenue \$125K year over year; cut response times 50% and raised CSAT from 97.6% to 99.2%.

Amazon Robotics · UT · PA · NY · NM

Apr 2020 – Jul 2022

Assistant Manager, Launch Teams

PERSONAL PROJECT

IAMAI Read-only Microsoft Entra identity posture assessment tool for MSPs, built on Microsoft Graph with delegated read-only scopes and no write path. Compares a connected tenant against a Conditional Access baseline, scores MFA viability from sign-in evidence rather than registration alone, and produces a phased implementation roadmap designed to avoid lockouts. Versioned JSON output contract with CI.

TECHNICAL

Identity & Access Entra ID, Conditional Access, MFA and passkeys, Windows Hello for Business, service principals and app registrations, GDAP, Microsoft Graph

Endpoint & Workloads Intune, Autopilot, device compliance, BitLocker, Defender for Business, Windows fleet authentication; Exchange Online, SharePoint, Purview policy sets, Business Premium provisioning, Copilot packaging

Platforms inforcer, NinjaOne, HaloPSA, Huntress, Keeper, Microsoft Partner Center / CSP

Practice Solution design and scoping, zero-trust access design, discovery and vendor comparison, identity posture assessment, machine identity hygiene, runbooks and documentation, service line packaging, AI-assisted PowerShell

CERTIFICATIONS & SPEAKING

Certified Microsoft SC-300 Identity & Access Administrator · Microsoft MD-102 Endpoint Administrator · ITIL v4 Foundations · Top Gun Certified Facilitator (Top Student Award)
